

Reviews Staubsauger „crac-ep“ Kône-Records 005 2004**Undercity-072.com**

Producer Martin Wigger returns as Staubsauger for his debut 12 inch on this Swiss' label Kone records.

While a regular staubsauger stands for noise within the avant gardistic music scene, this EP is the total opposite with it's perfect balance & mixture of six different high-quality melodic Electro productions; from the tense soundscape track "Crac" on to the deep Electro Disco track "It's a wave" and splendid glitchy Electronic track "Slice" to mention a few!

Therefor it is no surprise that Spezial Material licensed "It's a wave" and "Slice" for for their compilations and also picked up his track "7" which also got remixed by Skanfrom. Therefor Staubsauger sees himself well respected for these tracks on fellow country label Spezial Material and certainly his most recent released "Sylit EP" on 7B records!

Atome.com

Martin Wigger brings on the Geneva label 6 nice electro tracks. Sometimes slow and most of the time atmospheric, they all include beautiful sounds & melodies. About sound production and tracks' structures, we can on note great savoir-faire from this Swiss artist. Excellent: check it!!
